## 招新说明

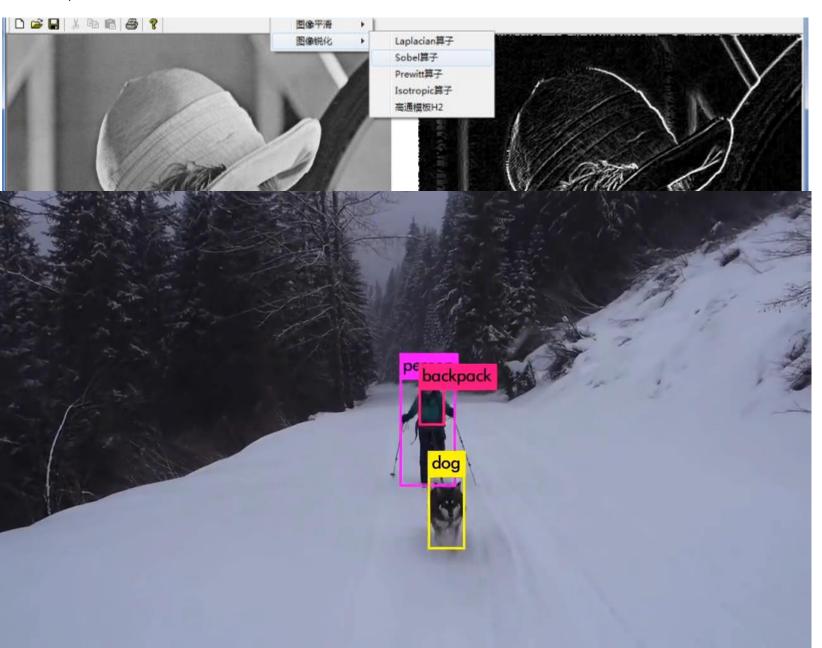

- 关于本次招新, 作以下几点说明:
- •1、视觉组主要招收对象为大二同学(有相关编程和开发基础)。
- 2、大一同学无基础可作为梯队队员入队学习,个别大一新生有 C++和相关比赛基础可直接和大二同学一起参加考核。
- 3、计划十月份一个月完成培训考核计划。
- 4、我们计划参加RMUA(人工智能挑战赛),对于高年级有ROS 或SLAM基础的同学欢迎私聊我,我们一起学习进步!
- 5、HFUT苍穹是一群热爱机甲,愿意学习、付出的人,我们欢迎工大所有喜欢机甲大师的同学!!!

# Vision Group @ Cangqiong

## Vision Group @ Canggiong

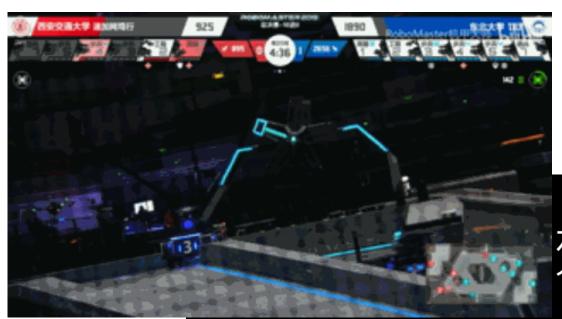

- 1、What is vision?
- 2、What you will learn?
- 3. Assessment method.
- 4. What can you get from it?
- •5、RMUA

## 1、What is vision?

Vision includes two aspects, machine vision and computer vision.

## The role of vision in robomaste

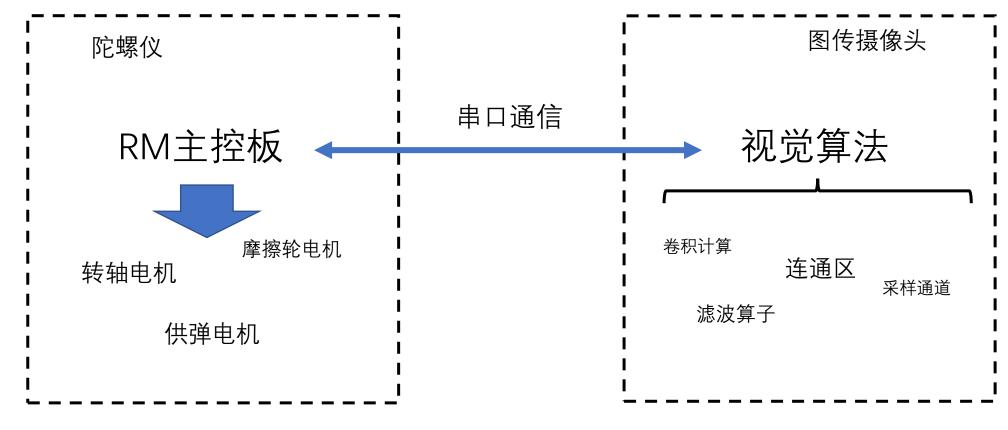

系统: Ubuntu1604

显卡: P106

### 自瞄准系统

# 简单技术介绍

RoboMasters

云台

Manifold妙算

### The role of vision in robomaster

#### 2.9 雷达

雷达架设于战场两边的雷达基座上,可以为全队提供全局视野,并将图像传回操作间。组委会提供 220V 交流电作为雷达的电源。

TODO/WADI =T

#### 2.5.1 自动步兵机器人

参赛队伍可以选择将至多一台步兵机器人制作成自动步兵机器人。在机器人整体性能上相较于一般步兵机器人有明显优势。自动步兵机器人不允许配置操作手,可以通过机器人间通信等方式接收来自其他机器人操作手的指令。

## 3. What you will learn?

- 1、Linux (ubuntu)
- 2 Opencv(C++ and python)
- 3、Git/github
- 4、 Machine vision
- 5. Computer vision
- 6、SLAM(Angle solution)
- 7、ML and DL
- ..etc

3. What can you get from it?

What do you want from it???

4. Assessment method.

Introdution of recruit

分值计算方法

60% FINAL EXAM 30% Homework 10%
Attendance

## RoboMaster University Al Challenge (RMUA)

KODOMYDIEK

#### 1. 赛事介绍

组委会提供统一标准的机器人平台,该机器人平台具备发射弹丸、攻击检测等统一标准的接口。参加 RoboMaster 2021 机甲大师高校人工智能挑战赛(RMUA 2021, RoboMaster 2021 University Al Challenge) 的队伍需自行研发算法,配合搭载的传感器和运算设备来实现机器人的自主决策、运动、射击。参赛队伍 不得使用非官方的机器人,亦不得使用除 RMUA 2020 以外的往届或其它比赛的机器人。

参赛队伍需要准备一到两台机器人,在 5.1m \* 8.1m 的比赛场地上进行全自动射击对抗。比赛过程中,机器人通过识别并发射弹丸击打对方的装甲模块,以减少对方的血量。比赛结束时,机器人总伤害量高的一方获得比赛胜利。

## RoboMaster University Al Challenge (RMUA)

## Responsibility:

- Develop algorithms include but not limited in:
- 1. Self-aiming algorithms for RM competition (including both target recognition and gimbal control)
- 2. LiDAR-based Simultaneously Localization and Mapping algorithm for UGV
- 3. Decision system for robotics (based on Finite State Machine or Deep Reinforcement Learning etc)
- 4. Develop the whole robotic system together with the embedding group and mechanical group
- 5. Write technical documents on existing codes.

## Requirements:

- 1、1. Good at coding. 1000 lines in C/C++, Python, Matlab etc.
- 2. Familiar with Linux.
- 3. Familiar with Robot Operating System (ROS)
- 4. Reading and writing ability in English.
- 5. Basic knowledge and practical experience in at least one of the below area:
  - Machine Learning / Deep Learning;
  - Robust control / non-linear control / self-adaptive control;
  - SLAM, sensor fusing algorithm;
  - Planing algorithm / Trajectory generating algorithm;
  - SFM, 3D Vision, Tracking algorithm
  - Digital Image Processing

# Welcome to the group of Vision @Cangqiong!!!

# Q&A
